EXECUTIVE SUMMARY

Terracotta cooling company

Who are we ?

"Eco-friendly cooling for a sustainable future"

Mission

We design Terracotta-based cooling systems that **reduce energy** use and provide **sustainable**, **affordable alternatives** to traditional air conditioning.

Vision

Our goal is to **revolutionize cooling** with Terracotta, creating **eco-friendly**, **energy-efficient** solutions that reduce energy use and environmental impact.

Values

Our team values **trust**, **honesty**, and **loyalty** to customers and the environment, ensuring these principles guide every aspect of our business. All stakeholders share this commitment.

Who do we sell to ?

Our main target customers include:

- **Eco-conscious buyers** (ages 25–50) prioritizing sustainability.
- **Efficiency-driven buyers** (ages 25–70) valuing performance and cost-effectiveness.
- **Families and seniors seeking** user-friendly, low-maintenance solutions for compact or rental spaces.

Urban, eco-conscious households and small businesses in Europe, starting with France, are our primary focus."

What are the drivers ?

With global temperatures expected to rise by up to **3.5°C**, many regions will become challenging to inhabit, increasing the need for **effective cooling solutions**.

Growing **concerns** for the **planet** and **future generations** are driving demand for sustainable, cost-effective **cooling alternatives**

Energy-efficient A/C solutions are vital for customers seeking **sustainability**. **Climargile** meets this need by offering a cooler that lowers temperatures by **5–10°C** with minimal electricity use.

COOLING INDUSTRY

€9.51B (2032)

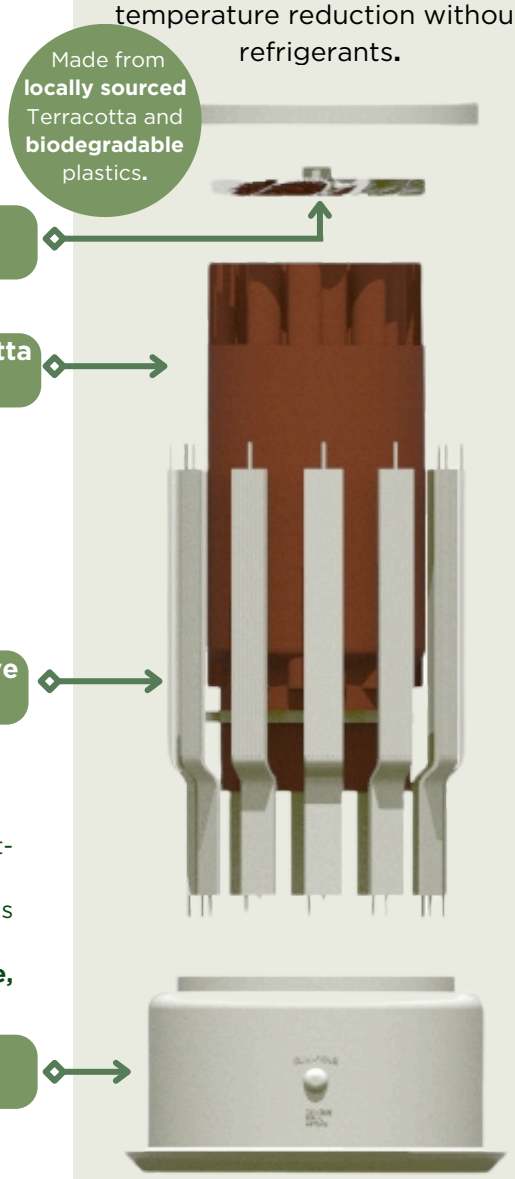
+54%

€6.19B (2023)

What do we sell ?

Climargile

A portable, terracotta-based evaporative cooler solution offering eco-friendly, cost-effective temperature reduction without refrigerants.



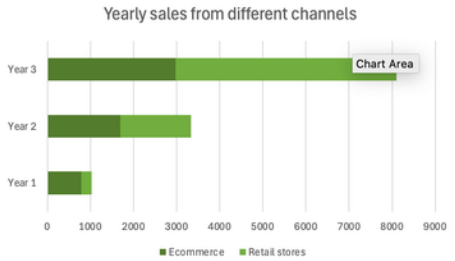
Price (VAT excl.)	€189
Energy Consumption	<100W
Cooling effect	Cools temperature by 5 - 10°C
Noise levels	20-25 dBa

EXECUTIVE SUMMARY

Terra Cotta Cooling Company

Distribution Channel

- **May 25** — Launch e-commerce platform to establish a direct online sales channel
- **Aug 25** — Collaboration with 5 retail stores to expand offline reach and brand presence
- **May 26** — Strengthen retail network by onboarding 10 additional retail partners
- **May 27** — Partner with 25 retail stores increase digital ad spend to drive higher website traffic



Direct cost of good sold

Production cost	
Raw material	27.45 €
Manufacturing supplies	9.72 €
Total production cost:	37.17 €
Sales and Distribution Costs:	
Shipping and delivery expenses	5
Transaction fees (e.g., credit card processing fees) (2% of MRP + 0.25)	3.43
Total sales and distribution cost	8.43
Total cost	**45.60 €**
